PROFESSIONAL SUMMARY

Software Engineer (React Developer) with experience since June 2025 building responsive frontend applications with React, Next.js, JavaScript and TypeScript. Experienced in REST API integration, state management and real-world business applications, including ERP, payroll, restaurant management and customer portals. Also built two full-stack personal projects using Next.js and MongoDB.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3
Frameworks and Libraries: React, Next.js, Tailwind CSS, shadcn/ui, Material UI, Zustand, TanStack Query, React Hook Form
Backend and Database: Node.js, Express.js, MongoDB, Mongoose, REST API integration, Socket.IO
Tools: Git, GitHub, Vite, PM2
Concepts: API integration, state management, authentication, role-based access control, responsive design, frontend architecture, testing, microservices basics

PROFESSIONAL EXPERIENCE

Software Engineer (React Developer)

Accurate Software Solutions | Kerala, India | June 2025 – Present | Full-time

- Develop and maintain frontend applications using React and Next.js.
- Build responsive user interfaces using Tailwind CSS and component libraries.
- Integrate REST APIs and implement frontend business workflows.
- Work on ERP systems, payroll applications, restaurant management platforms and customer portals.
- Mentor team members and assist with frontend technical decisions.
- Estimate frontend development tasks and test application functionality.
- Manage production builds, deployments and application processes using PM2.

Technologies: React, Next.js, JavaScript, TypeScript, Tailwind CSS, REST API, Git, PM2

PROJECTS

ERP Payroll Management System | Company Project (Team)

- Enterprise payroll and HR application covering employee records, salary processing, attendance, leave management and reporting. My involvement was frontend development, including interface development and API integration.
- Modules include salary journal vouchers and provisions, resignations, salary hold, earnings, deductions and loans, reports and exports, and authentication with SSO.

Technologies: React 19, TanStack Router, TanStack Query, Vite, Tailwind CSS, Zustand, React Hook Form, Zod, Recharts

ERP Business Management System | Company Project (Team)

- Next.js and React ERP frontend organized by business modules: finance, procurement, sales, inventory, fixed assets, HR and payroll, and administration.
- Dashboards, administrative interfaces, forms and data tables integrated with API services, with authentication and access management.

Technologies: Next.js 15, React 19, TypeScript, Material UI, Tailwind CSS, TanStack Query, Zustand, React Hook Form, NextAuth

Otantik Restaurant Management System | Company Project (Team)

- Platform of three connected applications: restaurant administration, a customer-facing digital menu, and a point-of-sale (POS) application.
- Administration: menus, outlets, employees, discounts, offers, customers, QR code generation, reports and role-based menu permissions. Digital menu: browsing, cart, favorites, ordering and payments. POS: orders, open tickets, split bills, payments, till shifts, manager approvals and real-time updates with Socket.IO.

Technologies: Next.js 14, JavaScript, Tailwind CSS, HeroUI, Material UI, Zustand, NextAuth, Axios, Recharts, Socket.IO

Herbal One Customer Complaint Portal | Company Project (Team, AI-assisted)

- Customer portal with OTP login, dashboard, order tracking, complaint creation and tracking, complaint chat, document downloads and push notifications. Frontend developed with AI-assisted development workflows.

Technologies: React 18, TypeScript, Vite, Tailwind CSS 4, Radix UI, Axios, React Context, Socket.IO, Firebase Cloud Messaging

Herbal One Staff Portal | Company Project (Team, AI-assisted)

- Internal staff portal with login and OTP verification, password reset and change, employee dashboard, user, role and permission management, audit logs and encrypted authentication request handling. Developed with AI-assisted workflows.

Technologies: React 18, TypeScript, Vite, Tailwind CSS 4, shadcn/ui, Radix UI, React Router 7, Axios, CryptoJS, Firebase

Life Saver Management System | Personal Project

- Web application for organizing First Aid Awareness Programs in schools and colleges: institution and student management, bulk student import from Excel and public registration links.
- Dashboard with image gallery, and participation reports with filtering and export.

Technologies: Next.js, React, JavaScript, MongoDB, Mongoose, Tailwind CSS, shadcn/ui

Inventory Management System | Personal Project

- Multi-company full-stack application with Super Admin and Company Admin roles and role-based access control.
- Company and administrator management, categories, products with search and filtering, stock and sales management, and dashboard reports.

Technologies: Next.js 15, React, JavaScript, MongoDB, Mongoose, REST API, authentication

EDUCATION

Diploma in Computer Engineering
Government Polytechnic College, Kalamassery | 2021 - 2024

Higher Secondary Education (Plus Two)
Government Boys Higher Secondary School, Aluva | 2019 - 2021
